SUMMARY

Senior Software Engineer with 8+ years of experience building scalable backend systems, APIs, and business-critical applications, with additional full-stack capability through Next.js and Vue.js. Experienced in Python, Django, FastAPI, Laravel, REST/GraphQL, asynchronous processing, payment integrations, and production AI integration, with a strong focus on performance, reliability, and scalable system design.

TECHNICAL SKILLS

Backend: Python • Django • FastAPI • Laravel • PHP • CodeIgniter
APIs & Architecture: REST APIs • GraphQL • Microservices • Celery • Asynchronous Processing
Databases: PostgreSQL • MySQL
AI Engineering: RAG • AI Integration • Prompt Engineering
Frontend: Next.js • Vue.js • JavaScript
Payments & Integrations: ACH • Payload • Payliance • Afterpay • Stripe • PayPal
Tools: Docker • Git

PROFESSIONAL EXPERIENCE

Software Engineer | Baraqi
Sep 2025 - Present | Remote

EasyBMV - ACH Payment & Vehicle Registration Platform | Python • Django • GraphQL • Celery • ACH

- Integrated Payload and Payliance ACH payment gateways for dealer account funding and transaction processing.
- Built automated dealer balance-replenishment workflows triggered by vehicle-registration activity and available balance.
- Developed Celery workflows for payment processing, transaction states, balance updates, confirmations, and background operations.
- Built Django/GraphQL APIs and payment orchestration for vehicle registration and title-order workflows.

Team Lead / Senior Software Engineer | OZ Techwork
Mar 2022 - Aug 2025 | Lahore

Wise Wheels - Vehicle Inspection Platform | REST APIs • Image Optimization • AI Integration

- Designed REST APIs for mobile and web vehicle-inspection workflows, supporting image handling and core business operations.
- Resolved high-volume upload bottlenecks for inspections involving 150+ images through image compression and backend-processing optimization.
- Optimized database/backend workflows and integrated an AI assistant with controlled business data and response guardrails.

WiseMarket - Multi-Country E-commerce Platform | Laravel • Next.js • REST APIs

- Led backend delivery for a marketplace operating across Australia, Pakistan, UAE, and New Zealand, covering catalogs, inventory, payments, rewards, and integrations.
- Coordinated the Next.js frontend migration, maintained API integrity, and guided implementation and troubleshooting.

Software Engineer | TxLabz Sep 2020 - Mar 2022 | Lahore

- Developed and optimized examination workflows for UVSchools, an international Laravel-based school management platform.
- Built B2B education features integrating Stripe, Twilio SMS, email automation, multi-role access, package/expiry logic, and Vue.js components.
- Improved legacy backend stability and maintainability through debugging, refactoring, and performance-focused changes.

Software Engineer | Ivy Lab Technologies Jan 2020 - Aug 2020 | Lahore

- Developed reusable Laravel and CodeIgniter modules and contributed to backend improvements within Agile delivery cycles.

Software Engineer - PHP | LeadConcept May 2018 - Dec 2019 | Lahore

- Developed and maintained PHP/CodeIgniter applications, REST APIs, MySQL-backed modules, client integrations, and production enhancements.

FEATURED PROJECT

Ask Raghad AI - AI-Powered Recommendation Platform | Node.js • Next.js • AI/RAG • APIs

- Enhanced an AI-powered recommendation platform providing structured product, travel, hotel, and shopping recommendations.
- Implemented AI response guardrails, structured outputs, dynamic CMS/admin functionality, and Google Sheets-based product-data synchronization.
- Improved backend/API workflows, bilingual Arabic/English experience, mobile responsiveness, caching, PDF export, and production reliability.

EDUCATION

BS Computer Science | Superior University, Lahore | 2012 - 2016
